

Trade-in program

Nordic Computer has initially been in the reseller/brokering business since 1979 with a specialized focus on used/refurbished high-end server, storage and network equipment. Because most of our customers ask for pre-owned equipment, one of our biggest challenges is to source used IT hardware.

That is why Nordic Computer offers the service to buy back your used equipment.

Why?

When you extend the life of your IT equipment, you simultaneously reduce the environmental impact in terms of less production, reduced packaging and transport of new equipment. Ask yourself whether you can upgrade rather than abolish? If you are replacing your equipment, can others in your company use it? If not, we can probably extend the equipments lifetime. That is what we, at Nordic Computer, call **Green IT**.

How?

Simply provide us with a list including the specifications mentioned below and we can quickly make you an offer that will not only increase your ROI but also extend your IT budget when purchasing a new solution.

The IT hardware that Nordic Computer can help you buy back

- Servers
- Networking (switches, directors etc.)
- Storage (tape/disks, controllers, expansions etc.)

We are interested in equipment from

- IBM
- Hewlett Packard
- Hitachi Data Systems
- EMC
- Sun Microsystems
- Brocade
- Cisco
- NetApp

Storage equipment

- Manufacturer and system-model
- Total storage capacity (raw)
- Hard disk type (qty, size, rpm speed)
- Special features and upgrades
- Time-span for availability to Nordic Computer
- Other relevant information

Server and networking equipment

- Manufacturer and system model or P/N
- CPU qty/speed
- Configured memory
- Hard disk type (qty, size, rpm speed)
- Time-span for availability to Nordic Computer
- Other relevant information
